

CHUX MICROFIBRE LIGHT CLOTH**Product Code**

➤ CHUX-MICRO

Product Description/Intended Uses

CHUX Microfibre Light Cloths are low-linting single-use microfibre cloths that are intended to be used in the inspection, assembly, cleanroom and controlled environments, to remove 99.99% of microbes.

The wipes work best when used damp to remove dust, dirt and bacteria. These can also be used dry for dusting and are ideal for cleaning touch screens like tablets and phones.

Microfibre wipes can also be used in combination with a wide range of chemicals for disinfection.
