

CHUX MICROFIBRE LIGHT CLOTH**Product Code**

➤ CHUX-MICRO

Product Description/Intended Uses

CHUX Microfibre Light Cloths are low-linting microfibre cloths that are intended to be used in the inspection, assembly, cleanroom and controlled environments, to remove 99.99% of microbes.

The Microfibre Light Cloths work best when used damp to remove dust, dirt and microorganisms. The cloths can also be used in combination with all leading chemicals for disinfection.

The cloths can also be used dry for dusting and are ideal for cleaning touch screens like tablets and phones.

The cloths are for one-off / limited use. The dirt / microbes stay locked inside the cloth's fibres until it is washed in hot water, this makes the fibres uncurl slightly to release their microbe content.

**Material**

CHUX Microfibre Light Cloth is manufactured from 100% Microfibre.

Properties-Typical Values

Weight	60 g/m ²
MD Strength	210 N/ 1 ply
CD Strength	65 N/ 1 ply
Thickness	1.75 mm/4plies
Water Absorption Capacity	850%

Size

Folded - 25 x 17cm

Opened out – 40 x 34cm

Quantity

40 sheets per pack.

Single-Use is Recommended

CHUX Microfibre Light Cloth is for one-off / limited use only.

Sterilising Compatibility

Not Applicable.
