CONTAINER ACCESSORIES

Containers are used worldwide to provide a protective barrier during the sterilization, handling and storage of surgical instruments. Regardless of which container model you are using, Key Surgical has just the right accessories.

Container filters are available in various shapes and sizes for a variety of container systems in accordance with the applicable standards.

Colored plastic seals in various shapes can be used for color coding and as a sustainable container closure option, paper seals are perfect for easy handling.

PAPER SEALS

We offer you an environmentally friendly way of closing containers. The seals can be attached to almost all common containers and follow a simple principle. With our paper seals you ensure safe closure for transport and storage due to thermal closure of the components. Available in different versions with and without documentation fields. In some cases, it is also possible to stick on labels. Single use.
