

T-EZ PRO™ - CLEANING INDICATOR

The T-EZ Pro contains a sheep blood compound that most closely resembles human blood. It is easy to use: just remove the T-EZ Pro from its package and attach it directly to the sieve tray. Thanks to the transparent plastic, there is no need to remove the indicator strip from its PCD for interpretation. However, it is possible to open the test body and archive the indicator for documentation purposes.

ABOUT:

- Easy to use all in one solution
- Ability to remove the indicator from the PCD to archive test result
- Single use
- Sheep blood compound as a verification indicator
