

BASINS, BOWLS AND CUPS

Part of a successful plan for the O.R. includes having high quality, durable supplies readily available. From solution basins designed with large rounded edges for easy pouring to procedure bowls used in conjunction with sterile labels for identifying solutions in the operating room, Key Surgical® O.R. Products include a line of basins, bowls and cups that are convenient and competitively priced.

FEATURES:

Constructed of heavy duty stainless steel or durable polypropylene plastic. Sterilizable. Various sizes available.

EMESIS BASINS - Seamless design for easy cleaning.

SOLUTION BASINS - Large rounded edges for easy pouring and cleaning. No-spin bottom for stability on flat surfaces.

SPONGE BOWLS - Widemouth bowls ideal for sponges. Flat bottoms and straight sides provide extra stability.

IODINE CUPS - Durable cups for easy handling during procedures. Available only in stainless steel.

MEDICINE CUPS - Easy-to-read measurements on the interior surface.

GRADUATED MEASURING CUPS - Easy grip handles and large, smooth pouring spouts with graduation on interior surface (both oz and cc).

O.R. AND PROCEDURE BOWL - Wide flange for labeling area. Available only in stainless steel.
