Corrosion inhibitor for the pre-treatment of surgical instruments

Spray foam

Fields of application:
- Intended for use as corrosion inhibitor for spraying onto surgical instruments in operating theatres directly after use

Performance spectrum:
- Corrosion inhibitor: prevents pitting corrosion on stainless steel instruments which can be caused by adhesive residues of blood or physiological saline solution
- Self-acting pre-cleaning already in the OR
- Suitable for surgical instruments incl. MIS instruments
- Anodised aluminium must be tested for suitability before use

Special properties:
- Prevents drying of surgical residues by keeping the instruments wet
- Facilitates subsequent cleaning
- Inhibits the growth of micro-organisms on instruments during contact time (bacteriostatic)

Application and dosage:
neodisher PreStop is sprayed undiluted on the surgical instruments in the transportation container for a complete wetting. Keep transportation container closed. The instruments treated with neodisher PreStop can be stored for up to 72 hours. Then rinse carefully and reprocess as usual.

General instructions for use:
- For professional use only.

- For applying neodisher PreStop the foam sprayer which is within the scope of delivery is to be used.
- Do not mix with other products.
- neodisher PreStop must be rinsed off with water (preferably deionised).
- Reprocessing should comply with all ordinances pursuant to the Medical Device Directive and should be performed with appropriate validated processes.
- Please observe the application recommendations given by the instrument manufacturer in accordance to the requirements of public standards such as ANSI/AAMI ST 79:2017.

Ingredients:
All components are listed in the TSCA inventory.
N-(2-hydroxyethyl)-N-[2-[(1-oxooctyl)amino]ethyl-ß-alanine;
Concentration: <1%

1,2-Benzisothiazol-3(2h)-one
Concentration: <0,05%

1,2,3-benzotriazole
Concentration: <1%

CE-mark:
neodisher PreStop complies with European guidelines for medical devices
