

ENDOSCOPE REPROCESSING: SMALL DIAMETER CLEANING BRUSHES

A vital part of effective endoscope reprocessing is manually cleaning the scope channels to remove gross debris and soil. For scopes with narrow channels, such as ureteroscopes, it's important to use a cleaning brush of the appropriate size diameter. And that means small. Very, very small. We have what you need.

- Small diameter scope brushes for manual cleaning of narrow channels in gastroscopes, ureteroscopes, cystoscopes, and bronchoscopes
- Diameters: 1.1mm, 2mm, 3mm
- Lengths: 65cm, 120cm, 160cm, 230cm
- Twisted stainless steel wire handle (excludes EB10106)
- Bulk packaging (50/pkg) available for select products

PRODUCT NO.		BRUSH DIAMETER	BRISTLE AREA LENGTH	LENGTH	QTY
BR-3030 BR-3030-50		1.1mm	1cm	65cm	1 50
BR-3035 BR-3035-50		1.1mm	1cm	230cm	1 50
