

O.R. PRODUCTS FROM KEY SURGICAL

ELECTRO LUBE®

Electro Lube® is an anti-stick phospholipid solution designed to keep tissue from sticking to the electrode instrument tip during an electrosurgical procedure, reducing eschar build up. Clinically demonstrated to reduce time spent on hand backs.

“High-quality evidence supports the use of an anti-stick phospholipid solution to reduce surgical time. An anti-stick phospholipid solution may be used to decrease eschar buildup.”

- AORN Guidelines 3.11.1

SURGICAL LIGHT HANDLE COVERS

Surgical Light Handle Covers are designed to fit over surgical light handles, allowing for sterile control of power on/off, intensity levels, and pattern size of the surgical light. Using a surgical light handle cover eliminates the need for cleaning and sterilizing of handles for every case. Select styles are compatible with select STERIS Harmony and HarmonyAIR Surgical Lights including the Harmony LA300 Exam Light. (LB53 and LB54)

SGL pack; 30/per case
DL pack 200/bx

For additional convenience, our universal light handle cover is designed to fit a wider range of brands and styles of surgical lights used throughout hospitals and facilities (LB82).

SHROUDGUARD COLUMN PROTECTORS

Surgical table columns are often damaged due to inappropriately placed equipment (arm boards, convective warming devices, etc) and repairs can be quite costly. Designed to prevent damage and repair costs, ShroudGuard is a 'fence-like' protector that mounts securely to the table column. The various models available are compatible with STERIS surgical tables. Easy to install and protects your investment. It has been said that “An ounce of prevention is worth... not paying thousands of dollars to repair the columns on your surgical table.”

NEUTRAL ZONE/SHARPS SAFETY

Key Surgical mats and drapes are used in the operating room to create a neutral zone for passing sharps between personnel during a procedure. Magnetic surfaces help hold instruments in place which is beneficial if the surface area on which it is placed is curved. Available as single use or reusable.

HAND IMMOBILIZERS

A variety of styles designed to position/immobilize the hand during an applicable procedure. Both Alumi-Hand® and DuraHand® are constructed of aluminum and are lead-free. Immobilizers feature an anti-tilt tab that prevents rotation of the arm during a procedure. Two styles shown here, for more please visit keysurgical.com.
