

# ABSORBENT FLOOR PAD

- Absorbent Floor Pads are designed for use in clinical settings to absorb liquids. Common areas of use include in front of scrub sinks, lab station floors, etc.
- Promotes environmental safety by absorbing and locking in liquid within absorbent core material (up to 3 L of absorbency per pad). Top layer of floor pad is non-linting
- Replaces the use of alternative absorbent materials such as towels, mops, or sheets for efficient procedure-room turnover
- Non-sterile, not made with natural rubber latex
- Choose from two styles:
  - AP2842 features low-slip microfiber bottom
  - AP2842P features non-slip, impermeable poly backing bottom

Product No.	Description	Qty
