

BRUSH ORGANIZER

Keep channel cleaning brushes organized and at-the-ready with the Key Surgical® Brush Organizer. With multiple built-in and angled pegs, you can also customize the organizer by adding additional pegs. The flush-mount design helps you maximize useable space in the sterile processing department.

- Keeps channel cleaning brushes organized and readily available for use during the decontamination process
- Featuring 12 built-in pegs that are angled and threaded to help keep channel cleaning brushes in place. Additional pegs can be added with the Pegged Bar (2 are included) which features adhesive backing to easily adhere anywhere on the organizer. Additional Pegged Bars can be purchased separately.
- Flush-mount design helps you maximize usable space in your department
- Durable, stainless steel that is easy to keep clean and a built-in drip tray to keep area below the organizer clean
