

K-WIRE AND PIN MANAGEMENT

A comprehensive line of high-quality Kirschner wires (K-wires), Steinmann pins, tools, and accessories that support your various needs in orthopedic procedures.

K-Wires and Steinmann Pins

- Precision manufactured in Germany from certified implantable stainless steel
- Available in a variety of lengths, diameters, and styles
- Contact your STERIS representative to cross-reference common sizes and styles from other suppliers

Sterilization Racks for wires, pins, or Twist Drill Bits

- Made from anodized aluminum (K-wire Racks) or U.S. surgical stainless steel (Twist Drill Bit Rack)
- Lid folds back and acts as a support to hold the rack in an upright position, optimizing space in the O.R.
- Sizes clearly marked on the rack for quick identification

Wire and Pin Cutters

- Multiple styles of high-quality German stainless steel wire and pin cutters

Wire and Pin Pliers

- High-quality German stainless steel wire and pin pliers
- Styles available: needle nose, flat nose, narrow nose, pin puller, slip joint, wire extraction, locking, and parallel

Twist Drill Bits

- Jacobs twist drill bits in a variety of diameters
- OR-grade German stainless steel
