

# POLYP TRAPS

Effectively retrieve polyps or other tissue specimens without having to sift through biomaterial to do so. Using Polyp Traps, available in single, dual, or four chambers, can help minimize procedure time as well as the risk of losing polyps during collection.

## ABOUT:

- Single, Dual (Drawer Type), or Four Chamber design available
- Reduce the risk of losing polyps and tissue during suction
- Filter and identify specimens according to need
- Designed to eliminate the need for manual manipulation and retrieval
- Non-sterile
- Single-use
